The Unity Think: The report of deaths in this city shows that about sixty children die deily, and mostly, too, with Diarrhea, Cholera Morbus and Dysentery. The cause of these diseases in many cases is unknown, but since the POROUS GLASS FILTER has been introduced, and the impurities of the water we drink exhibited, the origin of them has become apparent. Let avery family possess one; they cost but \$1.50, and are warranted to give satisfaction or the money will be refunded. Depot, Gothic Hall, No. 316 Broadway.

To Conquering and to Conquer.—If any fact more conclusive than another were wanting to prove the superiority of Bogle's celebrated Electric Hair Dye, it would be that of its rapid sale, trebling every month, and still on the increase in public estimation. Its effect on the hair is magical and truly astonishing, and it has only to be tried to prove its superiority over all others. This, with Bogle's Hyperion Fluid and other preparations, may be had of A B & D. SANDS, No. 100 Futon-st; RUSHTON, CLARK & CO. No. 273, and RICE & SMITH, No. 727 Brossway; CARY & CO. AND TRANSATLANTIC SKETCHES AFLOAT AND ASHORE, by Capt. Mackinnon, R. N., I Vol. 12mo. Cloth Science, paper 15 cents.

These lively jutings of a tour in America present an agreeable contrast to the tone of most British travelers in their observations on this country.

Capt. Makkinnon is a cosmopolitan by mature. He was born to rough it with a good heart, wherever fortune should send him, and is able to put up with "hog and hommitsy" when turbot and white hait are wanting. He is not disgusted with the United States because they still swinns something of the petulance and rudeness of hot-bionded youth; nor does he look for Phil Paiaces or Parthesons in the prairies of litinois. Vishing diffe, ant portions of America, in the course of an extensive tour, he scheen the size to sustain the interest of the reader.

His attention was particularly directed to the internal improvements and the material development in general or which the United States now presents such a criting example. On this subject his remains are always to the point, and evince great intelligence and discernment. Several plquant ansectotes are interpersed throughout the matra ive, showing a genuine love of fan in the cordial Eaglishman, which no doubt largely contributed to the fractom with which he seems to have made himself at home among all classes of suclety. His dashing, of hand decorptions are usually well adapted to the subject on the carpet, and while they are far more readable than can often be the case with the unpretending note book of a traveller, they furnish a great deal of invoctant information which can be relied on as of an authentic character. Captain Mackinnon is evidently a person of good breeding and good sease, and the frank, intelligent, and maily spirit of his bod will be do be the case with the unpretending note book of a traveller, they furnish a great deal of invoctant information which can be relied on as of an authentic character. SILLIMAN'S CHEMISTRY.—FIRST

PRINCIPLES OF CHEMISTRY; for the use of colleges and Schools. By Prof B. Sillman, Jr. A new edition of this work is in press and will be issued early in October next. This edition has been almost entirely rewritten, and is brought up to the present state of science, so far as is possible within its limits. The main features of irrarrangement remain unchanned, while every part has been worked up anew. The Organic Chemistry has been again entirely rewritten and contains much that will be new to the teacher as well as the pupil. Numerous and facely executed illustrations have been thrown into every part of the work, and those who have before adopted it will now find it still more worthy of their continued patronage. The sale of twenty four early editions has encouraged the publishers to spare no expense in maintaining the work in the first rank of its class.
